

Radish

Diego F1

- Equal, productive round red outdoor radish, specially bred for pre-pack and bunching.
- Advised for late spring-summer to early autumn productions.
- Shiny red bulb colour, thick skinned and size up to 45 mm.
- Excellent internal bulb quality (white colour).
- Strong tops and leaf attachment.
- High tolerance to splitting and pithiness.
- IR against *Peronospora parasitica* (Pp) on both bulb and leaves.

Hazera
Seeds of Growth

High/standard resistance (HR*): plant varieties that highly restrict the growth and development of the specified pest or pathogen under normal pest or pathogen pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest or pathogen pressure.

Moderate/intermediate resistance (IR*): plant varieties that restrict the growth and development of the specified pest or pathogen, but may exhibit a greater range of symptoms or damage compared to resistant varieties.
