

Sensera 

Medium cluster taste tomato

Viazera
Seeds of Growth

Sensera (HA 27451)

Presentation

The main advantage of this variety is the unique taste, product quality and presentation. High in sugar, brix up to 6, in combination with an balanced level of acid, freshness and a nice bite gives the Sensera an unique taste. The tomatoes are round, with an intense dark red colour and a very good fruit quality. The green parts are thick and keep their fresh quality over a longer period. The branches of the fishbone are higher than normal, this gives the truss a distinct appearance unlike any other medium cluster tomato. It combines taste and a distinguishable appearance, giving growers the possibility to offer something different to consumers if combined with a good shopper concept.

Official taste data of WUR

Product	Origin	Type	Taste	Sugar (refraction)	Acid	%Sap	Bite
Merlice	Delphy	TT	36	4.1	5.6	27	37
Cappricia	Delphy	TT	46	4.9	5.2	35	65
Sensera	Delphy	TT	51	5.6	6.5	30	73

Results of taste panels of WUR, produce harvested mid-September 2016

Average fruit weight

The AFW is depending on the number of fruits per truss, based on a limited trail in our greenhouse in Bleiswijk the AFW is approx. 100 – 110 gram.

Production and Average fruit weight

Product	Origin & time (weekly data)	Production Kg/m ²	AFW	Sugar (refraction) Avg of 2 tests	Plant vigour (on a 1-9 scale)
Lyterno	2017 full season	60,0	117	5,2	6
Cappricia	2017 full season	57,5	111	4,8	7
Sensera	2017 full season	58,7	100-115	5,8	8

Results of Hazera growing trials in Bleiswijk season 2017

Growing

Sensera is a vigorous plant, which has to be steered on the generative way. Plant is longer than standard, amount of flowers per cluster is approx. 9. Pruning advise is on 6-7, to get better balance in the plant and/or steer the fruit weigh to approx. 100 - 105 gr to get to a cluster weight of >500gr.

Grower/growing characteristics (Plant related)

FRUITS / CLUSTER:	6-7
HARVEST TYPE:	Cluster
VIGOR PLANT:	Strong
RESISTANCES HR:	Va, Vd, Fol (0-2), ToMV, For
RESISTANCES IR:	On

Supply chain processing characteristics

SHELF LIFE:	Very Good
FIRMNESS AFTER TEN DAYS:	Very Good
GREEN PARTS AFTER TEN DAYS:	Very Good
USAGE ADVISE:	Fresh market and/or pre-packed

Shopper characteristics (Fruit related)

FRUIT SHAPE:	Round
AVERAGE FRUIT WEIGHT IN GRAMS:	90-110
COLOR:	Red
JOINTED / JOINTLESS:	Jointless
SHININESS:	Good
GREEN PARTS:	Very good
REMARKS:	Good taste with good quality fruits
SUGGESTED SHOPPER USAGE:	Fresh cut and cooking
